

# CUSTOM MOTOR MANUFACTURING

When you've been in business as long as Flanders, you've managed to learn a thing or two. Our Custom Motor Manufacturing is where our experience and manufacturing capabilities meet. It is where all of Flanders' separate assets come together to create a solution to a specific customer need. From concept to design, from design to creation and from creation to commissioning, Flanders works closely with you to ensure your exacting needs and standards are met. Once you are satisfied, Flanders will handle the installation of our collaborative efforts, with a sense of satisfaction and professional pride.

Committed to maximum quality and rapid turnaround, in a cost effective manner, we consider no job to be too large or small. Obviously, with seven full-service locations and over 350 employees, we can rebuild or manufacture small motors, but, we're capable of manufacturing AC and DC motors as large as 7,000 horsepower. Our three-shift operation means fast, economical turnaround, and our trucking capability of over 100 tons, means we can deliver almost any size assembly.

## A partial list of Flanders' custom motor manufacturing includes:

- Resin Rich, Class H Insulation Systems,
- High Strength Shafts
- Proprietary Field Coil Insulation System
- ISO 9001:2000 Certified Process
- Thoroughly inspected and tested:  
component level to full voltage test run
- Drawings developed from on-site inspections  
or in house, during repair process

# LOCATIONS

Flanders is situated throughout the United States for easy customer access. Whether it is a full manufacturing facility or a field office, you will receive the full level of service that our customers have come to expect.
